

# SHORT PEACE FILMS

1133 Broadway Suite 1607 New York, NY 10010

## My first thought....

A decade ago when I started this company, I had a very vague idea. The idea is to make “something new” or “something different”. Since then our most concern is making films or videos with a bit of “deffernce”. As all other production companies do, we do research, shoot, edit almost same way, but we always think we put some “additional ingridient” on our products.

SHORT PEACE FILMS INC. was established 1998 as a television and film production company based in New York City. We have a production department and a technical department that both provide staff for entire film or video production.

We have experienced various kinds of productions and we have extended knowledge for “Live-broadcasting” like live-news coverage, multi-camera operation, overseas satellite broadcast.

**Short Peace Films, Inc.**

## *Direct!*

## **Short Peace Films**

Our production team is *directing, researching, and coordinating* for television and film projects. And we are especially professionalized in informational programs and sequence in various divisions of television production.

## *Shoot!*

## **Short Peace Films**

We don't carry any award-winning cinematographers. But we know many different ways of shooting. For example, *News ENG, Live broadcast camera, Stage video shooting* or documentary movie shooting. And we also know what equipment is the most appropriate for these shootings.

We also affiliate experienced cameraperson and we have directors who operate camera, so we could minimize number of crew.

## *Edit!*

## **Short Peace Films**

Editing must be very fast and neat. Our editing team is very good at it! Our editor works on *Avid™* network system (Media composer, Xpress and Airspeed™) for everyday broadcast. Others have knowledge for *Apple Final Cut™* making High Definition news clip for Japanese news program. Placing superimpose is most common work for them.

We put Japanese subtitle for an English movie and vice versa. Graphic work for TV and Internet contents are our new development. Now our editing team is working with Adobe CS, After Effect™, Boris Effect™ to make first flash movie.

## *Pitch!*

## **Short Peace Films**

We are working for various projects. We have connections in North America and Asia. And we can work any business between those countries. We can buy TV program in Japan and sell to US. Or we buy independent films here and sell in Asia.

In next several years, probably, Internet business will be our next main field to find work. We are currently planning an Internet news site share content in such as *“Facebook”*, *“Twitter”* and *“Youtube.”* We also have a project call *“Cutting Edge”* which correcting various short films made by struggle young filmmakers.
